New Delhi : Jakson Group, a leading energy and infrastructure Company takes a step forward towards mitigating climate change by launching EnerPack, its new Battery Energy Storage System (B.E.S.S).

This product provides carbon-free clean power and enables uninterrupted silent power supply while significantly reducing costs. Equipped with a hybrid inverter, lithium-ion batteries, and intelligent energy management system, it has the intelligence of combining grid power, solar power, wind power, and even DG power supply.

Its compact and modular design makes it easy to transport and install, while fast-charge capability and low-system energy consumption makes it practical and pocket-friendly. BESS's uninterrupted power supply ensures zero production losses without disruption in operations.

Speaking on the launch of EnerPack, Mr. Sameer Gupta, Chairman & Managing Director, Jakson Group, said, "As an environmental friendly company, we are excited to introduce the Smart Battery Energy Storage System which is going to bring about a revolution in the Distributed Energy space. This product is powered by an in-house design energy management system patented by Jakson and is capable of synchronization with various power sources.

It is designed to optimize power and maximize renewable energy usage that will reduce energy costs for our end customers. With this launch of Battery Energy Storage Systems, Jakson Group takes another step towards mission 'Aatmanirbhar Bharat' and reaffirms its commitment to mitigate climate change".

The BESS commences from a 5KW range, can be customised and further scaled up to meet commercial, defence, healthcare, residential and other industrial applications.

It also provides power backup for over 500 hours, reducing industry revenue loss due to power cuts. It requires a maximum 2 hrs of charging and can be remote monitored with encrypted data lagging. It also complies with IEC standards, and the enclosure has IP - 54 certified protection. The product doesn't require civil work and has in-house smart EMS for optimal performance and efficiency.

About Jakson:

Established in 1947, The Jakson Group has diversified from a Diesel Generator Manufacturing Organisation into an Energy Solutions Company providing expertise in Distributed Energy, Solar and EPC. The company emphasis on superior quality products & customized solutions selling. It offers the most viable & cost-effective solutions to its clients backed by long-standing expertise in the Energy Industry.

The Company has an extensive presence throughout India with 4 manufacturing facilities, 6 Independent Solar Power Plants, 30+ Sales Offices and a wide network of channel partners and dealers, making it one of the top 10 energy companies in India. The company has a presence in India, SAARC, Middle-East and Africa and employs over 2500 people with its Head Quarters in Noida Uttar Pradesh.
